Marble Cake

2 loafs

Ingredients

150 g	flour
30 g	FiberHUSK®
10 g	baking powder
200 g	sugar
50 g	potato flour
200 g	oil
4	egg
75 ml	water
10 g	vanilla sugar
50 ml	blackcurrant juice
25 g	cocoa

Stir sugar, oil, FiberHUSK®, egg, water and vanilla sugar in a bowl and mix well to a homogeneous mass. Add flour, baking powder and potato flour (starch) through a sieve. Stir hard to a homogeneous mass.

Take 1/3 of the dough and mix with the cocoa and 1/3 of the dough and mix with the blackcurrant juice.

Grease and flour two loaf tins and pour in alternating layers of the 3 mixtures. The tins will only be about 1/3 full, as the dough rises quite high.

Bake in a preheated oven at 160-170°C for about 45 minutes, depending on size and shape of the baking tins.

Tip:
The cake mixture is also well suited for muffins. Fill small baking tins 1/3 up with the mixture and bake in a preheated oven at 180°C for about 20 minutes.
